ACKNOWLEDGEMENT

This Human Resources for Health Bi Annual Report provides critical HRH information captured between March 2013 – June 2013. The report would not have been possible without the timely submission of the required data by different government officers in the public service. Special appreciation is extended to all Chief Administrative Officers and their teams composed of District Directors of Health Services, Principle Personnel Officers, Secretaries of District Service Commissions, biostatisticians and HMIS focal persons as well as Directors of Regional Referral Hospitals and their teams who provided timely data used to compile this report. This was done amidst a number of challenges including a busy schedule finalizing the financial year and rampant internet interruptions. Your cooperation and commitment in this regard is much appreciated.

Special thanks go to the technical team in the infrastructure Division of the MOH including Engs John Tumwesigye, Francis Wakabi, Denis Kiberu and Philip Sewankambo Mukasa who provided guidance on the staff accommodation standards for each level of health facility a key step in determining the current staff accommodation status.

Recognition goes to the editorial team who included Mr. Francis Ntalazi, Mr Badru Buyondo, Mr Louis Tugume (MoH), Dr. Vincent Oketcho, Dr. Grace Namaganda, Ms Sarah Murungi, Mr. Rogers Enyaku, Ms Lillian Akoyo, Ms Julian Baguma and Mr. Isaac Kagimu (UCP) who worked tirelessly to compile and analyze the HRH data as it came in from the districts.

Finally but not least credit is accorded to the USAID funded Uganda Capacity Program for both the technical and financial support that made the production of this bi annual report possible.

Ministry of Health;

P.O Box 7272;

Kampala.

INTRODUCTION TO THE REPORT

This is the Human Resources for Health (HRH) Bi Annual report for the period of October 2012 to March 2013. The main purpose of the report is to provide up to date, timely and accurate HRH information to key stakeholders to inform decision making in policy and planning. The report which was supposed to be produced in April 2013 was deliberately delayed to enable it to provide an updated HRH status after the national wide recruitment exercise.

This Bi Annual report therefore presents the highlights of the national recruitment exercises including the process, achievements lessons and recommendations. These are presented in the first section of the report. In the second section, the overall HRH status after the recruitment including the status by district is presented. The third section presents the current staff accommodation status in terms of numbers and state of repair an emerging topical issue worth investing in at this stage if the recruited health workers are to be retained especially in the HCIVs and HCIIIs.

SECTION 1:

NATIONAL HEALTH WORKER RECRUITMENT - THE PROCESS AND KEY ACHIEVEMENTS

INTRODUCTION

Staffing levels in the health sector have persistently been low with the proportion of approved positions filled ranging from as low as 48% in 2009 to 55% in 2012 at district level. Further it was noted that of the filled positions most were of support staff especially nursing assistants leaving high vacancy rates in all districts for professional health workers. The low staffing levels coupled with low staff retention and motivation, poor performance, high absenteeism rates and inequitable distribution of available health workers contributed to a reduction in utilization of health services and subsequently poor health indicators.

Conizant of the fact that a well performing health workforce is critical for the attainment of HSSIP outputs and targets, in September 2012, the MOH after wide consultations with different stakeholders submitted a memo to Cabinet requesting Cabinet to address the HRH crisis. The memo presented by the then Minister of Health Hon. Dr. Christine Ondo sought Cabinet's decision on increasing the number and improving the quality of HRH to deliver the needed health services in Uganda. Specifically in the memo, the MOH among others requested government to address the HRH crisis urgently by recruiting additional health workers to mitigate the challenges of understaffing both at the centre and local governments. The proposal gained instant support from both the ruling and opposition legislators. For the next three weeks HRH issues took the center stage of parliament's discussions and negotiations between the legislators and the executive. Finally for the first time in nearly fifteen years the government of Uganda approved a national wide recruitment of health workers for HCIIIs and HCIVs. The announcement was made on September 25, 2012 when the Prime Minister and Leader of Government Business in Parliament, Rt. Hon. Amama Mbabazi said "I am happy to inform you and this August House that we have managed to struggle and get sufficient funds to embark on the recruitment of a total 6,172 health personnel at health centre IIIs and IVs."

Although the approved number of health workers to recruit was 6, 172 the actual need for the targeted health units at the time of the recruitment was determined to be 10,210 excluding support staff. The main objective of the recruitment was to recruit a total of 10,210 health workers for HCIIIs and HCIVs.

THE RECRUITMENT PROCESS

The recruitment process was steered by a multi sectorial National Recruitment Task Force appointed by the Permanent Secretary Ministry of Health and chaired by the Director General of Health Services. Members of the task force who were selected from the different ministries and partner organizations are in table 1:

Table 1: Members of the National Recruitment Task force

Name	Title	Organization
Dr Jane Ruth Aceng	Director General Health Services	MOH
Dr Isaac Ezati	Director Health Services (Planning and Development)	MOH
Dr Francis Mwesigye Runumi	Commissioner Health Services (Planning).	MOH
Mr. Charles Twinomugisha	Commissioner Boards	Health Services Commission
Mr. Patrick Mpiima	Registrar	Allied Health Professionals Council
Dr Katumba Gubala	Registrar	Medical and Dental Practitioners Council
Dr Jackson Amone	Assistant Commissioner Health Services (Clinical Services)	MOH
Ms. Savia Mugwanya	Assistant Commissioner Human Resource Management - Payroll	Ministry of Public Service
Mr. Godwin Kakama	Assistant Commissioner Budget Policy	Ministry of Finance Planning and Economic Development
Mr. Sam Eitu	Principle Personnel Officer	Ministry of Local Government
Ms. Juliet Kyokuhair	Senior Economist	Ministry of Finance Planning and Economic Development
Mr. Rogers Enyaku	Ag. Assistant Commissioner (Budget and Finance)	MOH
Mr. Tom Aliti	Principle Finance Officer	MOH
Mr. Francis Ntalazi	Assistant Commissioner Human Resource Management	MOH
Ms. Edith Kusasira	Principle Personnel Officer	MOH
Mr. Badru Buyondo	Senior Personnel Officer	MOH
Mr. Louis Tugume	Personnel Officer	MOH
Dr Vincent Oketcho	Chief of Party	Uganda Capacity Program
Dr Grace Namaganda	Deputy Chief of Party	Uganda Capacity Program
Ms. Sarah Murungi	Senior Advisor (HRM)	Uganda Capacity Program

The task force met fortnightly to discuss progress, address challenges and provide overall guidance to the recruitment process. The task force reported to the MOH Top Management on a weekly basis and to the Health Services Committee of parliament every month. The Human Resource Division of the Ministry of Health with support from the USAID funded Uganda Capacity Program provided the secretarial support to the task force.

Through the task force a number of undertakings were made and accomplished. They include;

1. Development and submission to parliament of the implementation plan for the recruitment. This was a requisite made by the Prime Minister and Leader of Government Business in Parliament, Rt. Hon. Amama Mbabazi when he announced the approval of 49.5 billion shillings for recruitment.

2. Extension of deadline for receiving applications to enable Health Professional councils register eligible health workers
3. Guidance on how to handle registration and licensure issues aimed at reducing forgeries
4. Development/review and dissemination of recruitment guidelines to be used by DSCs
5. Review and approval of district budgets to cater for the recruitment costs.
6. Guidance on the recruitment of health workers deployed by MOH
7. Preparation and submission of the supplementary wage budget request for district to the Ministry of Finance Planning and Economic Development (MOFPED).
8. Provision of continuous technical support and communication to the districts via email and telephone
9. Supervision and monitoring of the Computer Aided Shortlisting training in districts.
10. Assessment of the functionality of DSCs in 104 districts
11. Provision of overall technical support , supervision and monitoring of the recruitment exercise
12. Lobbying for retooling of DSCs and as a result Uganda Capacity program provided computers and UPS's to 16 districts

KEY HIGHLIGHTS OF THE RECRUITMENT PROCESS

Consultative meeting with Local Governments

The MOH in collaboration with central ministries and partners called a one day planning meeting with CAO, Secretaries / Chair persons DSC, PPOs and DHOs. Among others, the objective of the meeting was to review and finalize the district recruitment plans for HC IVs and HC IIIs as well as agree on how to manage the mass recruitment exercise. Attendance to the planning meeting was 99% with all the districts in attendance with the exception of Nakapiripirit district.

The meeting was facilitated by the MOH (PS, DG and Director planning), Chairperson of the HSC, MOLG (Representative of the PS), MOFPED and MOPS. Discussions were candid and constructive. The meeting mood was jovial and collaborative.

Some of the participants at the meeting

Some of the facilitators at the meeting

Key actions agreed upon during the stakeholder planning meeting included:

1. Running a joint advert for the recruitment.
2. The centre to provide overall guidance to the recruitment process including conducting monitoring visits to the districts
3. Health workers deployed in the districts by MOH to be encouraged to apply. Districts were requested to give these health workers priority in the recruitment process if they met the performance expectations and minimum qualification for the vacant positions.
4. As part of the motivation strategy, districts would promote existing health workers that met the requirements for the senior positions advertised and the gaps created through the promotions would then be filled using the order of merit list.
5. For districts that had recruited health workers but had no wage it was agreed that these would be accessed to the payroll together with the newly recruited health workers.
6. To expedite the process, the funds for the recruitment exercise are appropriated under the MOH for onward disbursement to the General Fund Accounts of the respective districts.

By the end of the meeting the recruitment plan had been finalized and the stage was set for running the joint advert. Below is a summary of the reviewed recruitment plan.

Table 2: Reviewed recruitment plan by post

	Post	NO. TO RECRUIT	GRAND TOTAL PAY (JAN - JUN 2013)
1	Senior Medical Officer	152	2,280,000,000
2	Medical Officer	212	3,180,000,000
3	Senior Clinical Officer	505	3,356,294,640
4	Clinical Officer	580	2,735,106,000
5	Anesthetic Officer	184	867,688,800
6	Anesthetic Assistant	268	797,630,712
7	Senior Nursing Officer	177	834,678,900
8	Enrolled Nurse	1887	5,616,153,558
9	Enrolled Midwives	1393	4,145,893,962
10	Lab. Technicians	751	3,541,490,700
11	Lab. Assistants	484	1,603,034,136
12	Nursing Officers – Nursing	595	2,805,841,500
13	Nursing Officers – Midwifery	245	1,155,346,500
14	Public Health Nurse	183	1,216,241,424
15	Ophthalmic Clinical Officer	162	763,943,400
16	Health Inspector	160	754,512,000
17	Dispenser	183	862,973,100
18	Public Health Dental Officer	101	476,285,700

	Post	NO. TO RECRUIT	GRAND TOTAL PAY (JAN - JUN 2013)
19	Assistant Entomological Officer	114	537,589,800
20	Nursing Officer (Psychiatry)	124	584,746,800
21	Assistant Health Educator	140	660,198,000
22	Theater Assistant	234	775,020,636
23	Enrolled Psychiatric Nurse	143	425,601,462
24	Cold Chain Assistant	165	491,078,610
25	Stores Assistant	126	224,828,352
26	Accounts Assistant	115	380,886,210
27	Health Assistant	430	1,279,780,620
28	Health Information Assistant	418	1,244,065,812
	Total	10,231	43,596,911,334

The reviewed recruitment plan put the need for health workers at 10,231 with a wage requirement of 43.6 billion for estimated six months that they would be paid. These vacancies were advertised and subsequently the recruitment exercise commenced.

SUMMARY OF THE RECRUITMENT PROCESS

The recruitment exercise entailed the following activities: advertising, receiving applications, shortlisting, interviewing, making job offers and reporting to work. The progress of these steps is summarized in the figure below:

Figure 1: Summary of the recruitment process

The advert and overall response

The advert was run in both the Monitor of 19th October and the New Vision of 22nd October 2012. The advert was further posted on notice board of districts and MOPS, HSC, MOLG and MOH as

well as the websites of the relevant ministries and the HSC. Although the national target was to recruit a total of 6,172 health workers, 10, 210 vacancies were advertised based on actual need. A total of 37,305 applicants were received and of these 24,266 were short listed representing 65% of the applicants. The key cadres that had higher chances of not meeting the short listing criteria included: Stores Assistants, Public Health Nurses, Cold Chain Assistants, Health Information Assistants and Ophthalmic Clinical Officers. The reasons for not meeting the short listing criteria included:

1. Lack of or non-presentation of valid registration and licensure certificates
2. Forged academic papers which is rampant in the sector
3. Training in health institutions which are not officially recognized and
4. Applying for positions for which the applicant did not meet the minimum qualifications

Receiving applications and shortlisting

In most districts, the short listing was done using the Computer Aided Short listing software to increase efficiency and objectiveness of the process. Out of the 24,266 applicants short listed, 18,468 (76%) turned up for the interviews. This was mainly due to the fact that many candidates applied to more than one district. Some of the candidates also failed to turn up for the interviews because the interviewing process occurred nearly during the same period. The observed low turn up for interviews could also be attributed to change of mind of applicants after further consultations about the district where they applied or discussions with friends and family. This mainly affected Laboratory Technologists, Laboratory Assistants, Cold Chain Assistants and Enrolled Nurses.

The interviews

The interviews were conducted by the respective DSCs or borrowed DSCs from neighboring districts for districts that had functional DSCs. The DSCs had technical staff sitting on the panels to make the technical assessments. Only 10,663 (58%) applicants out of the 18,468 that were interviewed passed the interviews. This was mainly due to poor performance of the candidates at the interviews despite having the minimum required qualifications. For example there were cases where some of the applicants could not even express themselves in English let alone respond logically to the technical questions posed to them. The other rampant challenge experienced was forgery of academic certificates which on verification during the interviews were confirmed to be forged. Failure to come with original academic certificates was also another reason why some of the applicants did not pass the interviews. The cadres that passed the interviews least were accounts assistants, laboratory assistants, health information assistants, health inspectors and enrolled nurses.

Making the job offers

8,353 (78%) applicants out of the 10,663 that passed the interviews were offered the jobs they applied for by the respective DSCs. The discrepancy is due to the fact that in some districts the

number of applicants that passed the interviews was much higher than the positions available in the districts. In such cases, the number offered jobs were less than number who passed interviews. The excess candidates were kept on the merit list and were to be called upon in case any of the applicants offered the job did not turn up. Cadres in this category included: accounts assistants, nursing officers midwifery, enrolled psychiatric nurses, senior nursing officers and laboratory assistants. Also because the recruitment involved promotions, the candidates on the merit list were to be called upon to fill the vacancies created by the promotions. The merit list is valid for six months after the interviews.

Reporting to work

86% of the candidates that were offered the job reported to work. Dispensers, nursing officers' midwifery, Public Health Dental Officers, theater assistants, ophthalmic clinical officers and anesthetic officers were among the cadres who turned up least. The reception successful candidates received on collecting their appointment letters, posting to rural health units and the fact that candidates applied to more than one district contributed to the observed turn up for work after being offered the job. Lack of accommodation was also reported to have discouraged appointed health workers from turning up for work.

Importance of induction of newly recruited health workers

Timely induction/ orientation of the newly recruited health workers was reported to improve turn up since the successful candidates get their key concerns and fears addressed by the district leaders whose word they trust. For example it is reported that in Kabarole after the orientation more doctors picked their appointment letters and turned up for work because they had earlier thought that the enhanced pay of 2,500,000 was a sham since it was not reflected on the appointment letters given that it is an allowance(allowances are not put in appointment letters).

OVERALL RECRUITMENT RATES BY CADRE

Below is a summary of the recruitment rates by cadre.

Table 3: Summary recruitment rates by cadre

Cadre	No. of postions advertised	No of postions filled	%
Nurses (all categories)	3,108	2,688	86%
Clinical officers (all categories)	1,254	989	79%
Laboratory technicians and assistants	1,246	905	73%
Midwives (all categories)	1,610	1,067	66%
Other cadres	1,997	1,270	64%
Doctors (all categories)	371	196	53%
Dispensers	179	43	24%
Anesthetic officers and assistants	445	53	12%
Total	10,210	7,211	71%

As noted from the figure the overall recruitment rate for all cadres was at 71% i.e. 7,211 out of 10,210 jobs advertised. It should be noted however that this is based on data received from the districts at different times starting in March to June. The actual number of staff who reported to

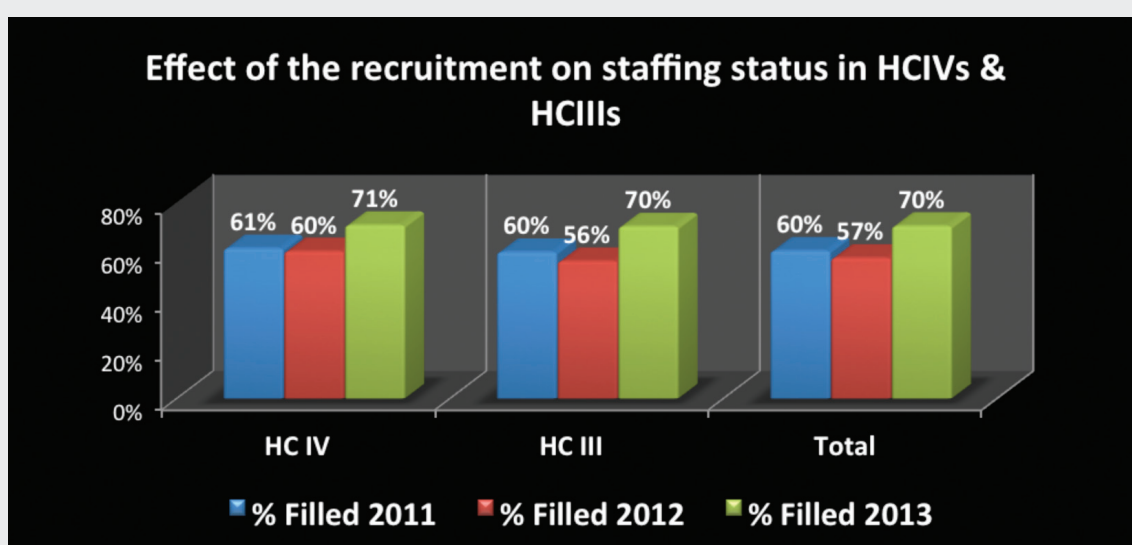

work therefore could be higher if more health workers reported for work after data had been submitted.

Nurses, clinical officers, laboratory technicians and assistants had the highest recruitment rates while anesthetic officers and assistants, dispensers and doctors had the lowest recruitment rates.

EFFECT OF RECRUITMENT ON STAFFING LEVELS AT HCIVS AND HCIIIs

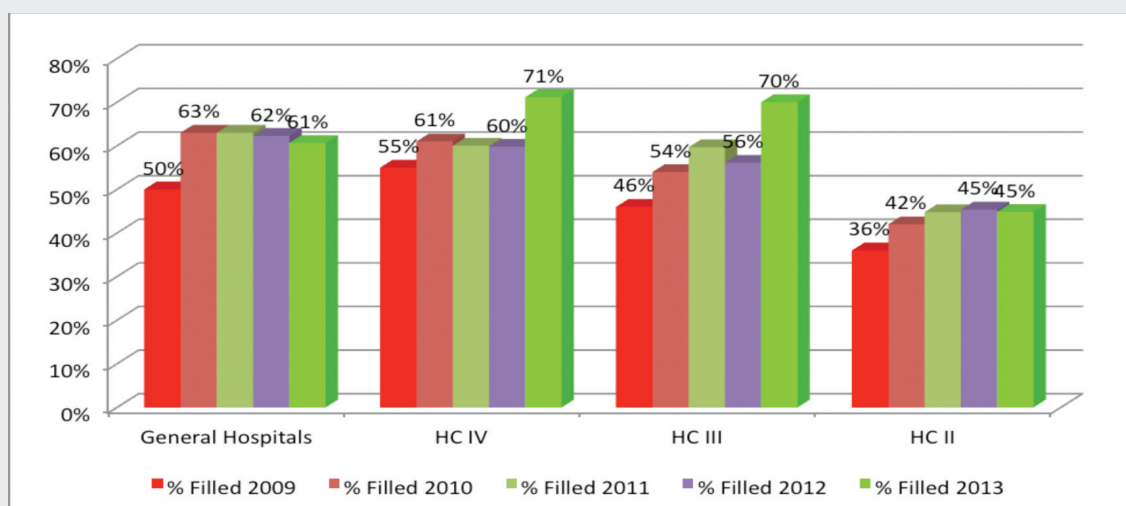

The effect of the national recruitment exercise on staffing levels in HCIVs and HCIIIs was assessed by comparing the staffing levels in 2012 as per the audit report and the current staffing levels after recruitment. The results are summarized in the following figure.

Figure 2: Effect of the recruitment on staffing levels in HCIVs and HCIIIs

It can be noted that the overall staffing levels at HCIVs and HCIIIs improved from 57% in 2012 to 70% after the recruitment. The highest improvement was in HCIIIs which made a 14% increment moving from 56% to 70%. The overall effect of the recruitment on the overall district level staffing will be presented in the next section i.e. on district HRH status.

Figure 3: Trend of proportion of health workers in post working at the different levels of health facility

From the figure it can be noted that over time the trend of health workers working in the targeted health units ie HCIIIs and HCIVs has been increasing and more significantly after the just concluded recruitment. The staffing levels for HCIIIs have increased albeit slowly from 36% and stabilized at 45%. On the other hand the staffing levels for general hospitals which have been relatively fair and stable decline by 1% after the recent recruitment a fact attributed to the fact that some hospitals lost doctors to HCIV due to the enhanced pay for doctors at HCIV. The result of this is improved service coverage in rural areas served by the LLHUs.

SUMMARY RECRUITMENT STATISTICS BY POST

The table below presents the summary recruitment statistics by post. As will be noted in the table and as has been discussed earlier, recruitment rates were poor for anesthetic assistants, ophthalmic clinical officers, Public Health Nurses, Anesthetic Assistants, dispensers, theater assistants and cold chain assistants. On the other hand the recruitment rates were good for laboratory assistants, enrolled nurses, nursing officers- nursing, clinical officers, nursing officers midwifery and health information assistants.

Table 4: Recruitment statistics by post

	Cadre	No. Positions advertised	No of Applications received	No. interviewed	No offered the job	No. of positions filled	Recruitment rate
1	Lab. Assistants	502	4,067	1,934	548	513	102%
2	Enrolled Nurse	1,906	9,706	4,830	1,994	1,811	95%
3	Nursing Officers - Nursing	610	2,923	1,622	627	573	94%
4	Clinical Officer	587	2,556	1,478	631	541	92%
5	Nursing Officers - Midwifery	239	1,071	708	265	214	90%
6	Health Information Assistant	418	3,330	1,132	409	356	85%
7	Accounts Assistant	119	1,658	687	103	101	85%
8	Senior Clinical Officer	508	1,194	721	550	429	84%
9	Health Assistant	436	1,479	772	404	357	82%
10	Enrolled Psychiatric Nurse	144	446	292	120	104	72%
11	Health Inspector	156	622	362	134	112	72%
12	Senior Nursing Officer	148	646	291	111	102	69%
13	Assistant Entomological Officer	113	250	137	86	72	64%
14	Public Health Dental Officer	99	268	142	78	62	63%
15	Enrolled Midwives	1,371	2,736	1,499	1,050	853	62%
16	Nursing Officer (Psychiatry)	123	307	161	83	73	59%
17	Medical Officer	219	394	242	155	129	59%
18	Lab. Technicians	744	1,446	775	509	392	53%
19	Senior Medical Officer	152	163	102	83	67	44%
20	Assistant Health Educator	138	204	74	63	53	38%
21	Stores Assistant	129	861	126	53	49	38%

	Cadre	No. Positions advertised	No of Applications received	No. interviewed	No offered the job	No. of positions filled	Recruitment rate
22	Cold Chain Assistant	161	209	66	53	46	29%
23	Theater Assistant	228	252	97	71	62	27%
24	Dispenser	179	126	61	53	43	24%
25	Anesthetic Officer	182	123	67	50	36	20%
26	Public health Nurse	177	140	41	26	25	14%
27	Ophthalmic Clinical Officer	159	71	24	26	19	12%
28	Anesthetic Assistant	263	57	25	18	17	6%
	Total	10,210	37,305	18,468	8,353	7,211	71%

SUMMARY RECRUITMENT STATISTICS BY DISTRICT

The table below presents the summary recruitment statistics by district. As will be noted from the table reporting on the recruitment statistics from the Local Governments was not 100% and this was the case mainly for the municipalities. This means that the actual numbers recruited and reported to work is actually higher. Nevertheless from the data received it can be observed that recruitment rates varied from one district to another. Best recruitment rates were observed in Mbale, Kumi, Moroto, Bukedea, Mpigi, Iganga, Kween, Lira municipality and Mityana.

On the other hand the lowest recruitment rates were observed in Buliisa, Rakai, Nakapripiti, Kabale, Abim, Wakiso, Mukono and Ntoroko. The picture in these districts could also be different if more health workers reported for work after the districts had submitted the recruitment statistics.

Table 5: Summary recruitment statistics by district

	Local Government	No. positions advertised	No of Applications received	No. interviewed	No offered the job	No. of positions filled	Recruitment rate
1	Mbale	103	527	323	205	205	199%
2	Kumi	56	241	166	68	67	120%
3	Moroto	27	75	69	31	31	115%
4	Bukedea	55	273	101	58	58	105%
5	Mpigi	72	406	4	74	74	103%
6	Iganga	87	383	177	78	88	101%
7	Kween	94	188	113	88	95	101%
8	Lira Municipality	2	38	2	0	2	100%
9	Mityana	143	626	510	156	141	99%

OVERALL CHALLENGES, LESSONS LEARNT AND RECOMMENDATIONS

Failure to attract some cadres of staff

The key challenge experienced during the recruitment was failure to attract some cadres of staff. Particularly : anaesthetic assistants, ophthalmic clinical officers, Public Health Nurses, Anaesthetic Assistants, dispensers, theatre assistants , cold chain assistants, midwives, Senior Medical Officers and Medical Officers.

Recommendation

1. Improve the remuneration of Public Health Nurses given their training levels and perquisite experience. This will increase enrolment rates into schools and subsequently the availability and willingness of these cadres to join the service.
2. Recentralize the recruitment and deployment of doctors to enable limited rural attachment. This should be coupled up with scholarships for further studies after 2 years of rural posting.
3. Increase production of anaesthetic officers, ophthalmic clinical officers dispensers and midwives.
4. Revitalize the training of theatre assistants, anaesthetic assistants and start training of cold chain assistants.

Wide spread lack of midwives on the market

Results of the monitoring visits to the districts showed that more than 80% of those who applied, were interviewed and passed interviews for midwifery positions were comprehensive nurses. However according to the new scheme of service for nurses that was passed in November does not allow their appointment for midwifery positions. The scarcity of midwives on the market is as a result of having stopped the vertical training of midwives in 2006 when the training of comprehensive nurses started.

This challenge was discussed by the National Recruitment Task force and the MOPS guided that the ECNs be recruited on a trial basis and redesignated after training in midwifery. The details of this guidance are in the letter on the next page.

THE REPUBLIC OF UGANDA

MINISTRY OF PUBLIC SERVICE

P.O. Box 7003

KAMPALA, UGANDA

IN ANY CORRESPONDENCE ON **PMD 10/17/01**
THIS SUBJECT PLEASE QUOTE

16th April, 2013

The Permanent Secretary
Ministry of Health
Kampala

**RE: APPOINTMENT OF ENROLLED COMPREHENSIVE NURSES
AS MIDWIVES**

Reference is made to your letter ADM.147/231/01 dated 22nd March, 2013 in connection with the above subject.

The Ministry has taken due cognizance of the critical shortage and urgent need for Midwives across the country, and the fact that several Enrolled Comprehensive Nurses were recruited by District Service Commission as Mid Wives to mitigate the shortage.

In a bid to harmonize the above decision with the requirement of Circular Standing Instruction No.4 of 2012, concerning the Schemes of Service for the Nursing Cadre, you are guided as follows:

1. All Enrolled Comprehensive Nurses recruited as Midwives by District Service Commissions should have their probationary appointment letters withdrawn and the relevant District Service Commission Minutes be rescinded. Instead they should be offered appointment on trial basis for 3 years, in line with Section A-b, (b) (v) of the Public Service Standing Orders. To this end, the provision under this clause limiting the maximum period to "not more than two (2) years" is hereby waived.
2. The Ministry should undertake to retrain the affected officers to enable them acquire the requisite qualifications for appointment on Permanent terms. For this purpose a grace period of up to 3 years from the time of the 1st intake is to be accorded to your Ministry in collaboration with Ministry of Education and Sports to have the retraining programme concluded.

3. Upon certification of completion of the required training by the relevant Ministry, such officers shall be offered appointment as enrolled Midwives by the respective District Service Commissions. The effective date of appointment shall be the date they assumed duty on trial. The probationary period shall be waived in their case.
4. Upon the expiry of the 3 year grace period, those officers on trial who will not have acquired the necessary qualifications, shall cease to practice Midwifery and the respective District Local Government will have the option of recommending them for appointment as Nurses or releasing them to the open labor market.
5. The Ministry of Public Service will appreciate regular updates on the progress of training and will keep this matter in view.

Adah K. Muwanga (Mrs)
For: PERMANENT SECRETARY

C.c. Permanent Secretary
Ministry of Education and Sports
Kampala

C.c. Secretary
Health Service Commission
Kampala

C.c. Chief Administrative Officers

C.c. Secretaries
District Service Commissions

Recommendation

1. Targeted Sponsorship for midwifery training.
2. Consider improvement of terms of service for midwives
3. Career guidance of students into midwifery

Few new health workers recruited

As will be discussed later the total number of new health workers recruited into the system is relatively low due to internal movements i.e. health workers moving from hospitals to HCIVs and HCIIIs and from one rural district to a more urban district and from a lower cadre to a senior position. Hence the net increase in staffing is not significant.

Recommendation

1. Monitor the wage performance in June and July and based on the projected consumption conduct another round of recruitment early in the financial year to improve wage utilization.
2. Access all health workers previously recruited but had no wage onto the payroll immediately
3. Enhance pay for doctors in district hospitals where there are no HCIVs to ensure retention of doctors in such districts.

Induction of newly recruited health workers

Induction of newly recruited health workers has proved to improve retention, performance and motivation of health workers hence a key intervention.

Recommendation

1. Districts should prioritize this activity in the 2013/14 financial year.

Lack of accommodation is greatly affecting staff attraction and retention

Reports from districts show that the rate of health workers reporting to work after appointment was greatly affected by lack of staff accommodation. Even for the health workers who reported to work their retention will be greatly determined by the availability and state of their accommodation. The Discrete Choice Experiment study conducted in 2011 which was aimed at determining the key attraction and retention factors for health workers revealed that the quality of health facility including the quality of staff housing was a key determinant in attracting and retaining all cadres of health workers.

It is high time therefore that government, partners and all stakeholders prioritized staff accommodation as a strategy to address the issue of health worker attraction, retention and motivation. In the last section of this report, the current status of staff accommodation is provided in detail to guide planning and decision making in this regard.

Recommendation

1. MOH should develop a comprehensive staff accommodation development plan to guide implementation in this area
2. Government and partners should consider supporting the implementation of the staff accommodation development plan especially in HCIVs and HCIIIs where there is need to retain majority of health workers to improve the sectors' responsiveness to the needs of Ugandans.

SECTION 2:

DISTRICT HUMAN RESOURCES FOR HEALTH STATUS AS OF JUNE 2013

INTRODUCTION

The Human Resources for Health (HRH) status reported in this section is based on self-reports from districts. District Health Officers were requested to send their HRH status after recruitment using a uniform reporting format. Data used to compile this section of the report was obtained from reports received from the districts as 19th June 2013. It was not possible to take in the revised data for districts that revised their reports and submitted after 19th June 2012. This means therefore that the actual staffing levels could be much higher and this updated staffing status will be presented in the 2013 Audit report. Credit is accorded to those DHOs who were able to send the data in a timely manner hence enabling the compilation of this status report.

In this section a summary of the staffing status in all districts by level and the trend in district staffing levels from 2009 to 2013 is presented to give an overall picture of the staffing situation in the country. Later the HRH status by district is presented to illustrate the overall staffing status for each district across the country. The final presentation of the HRH status is a detailed district by district staffing.

SUMMARY OF DISTRICT HRH STATUS

Table 6: Summary HRH status in districts as of 30th June 2013

District & Facility level	No of Units	Total Norms	Filled	Vacant	% Filled	% Vacant
DHO's Office	112	1,232	703	529	57%	43%
General Hospital	42	7,980	4,842	3,138	61%	39%
HCIV	169	8,112	5,731	2,384	71%	29%
HCIII	906	17,214	12,070	5,144	70%	30%
HCII	1,596	14,364	6,428	7,936	45%	55%
Municipal Council	10	77	35	42	45%	55%
Big Town Council	11	75	26	49	35%	65%
Small Town Council	88	440	131	309	30%	70%
Total	2,934	49,494	29,966	19,531	60.5%	39%

Based on the data received from the districts, the HRH status as of June 2013 was 60.5%. This level of staffing is however lower than was anticipated after the recruitment and could be attributed to a number of factors including but not limited to: Some districts might not have submitted the most updated HRH status data given that data collection on this variable started in March when staff movements after the recruitment had not stabilized. The other reason could be the poor reporting by municipalities.

Nevertheless these results so far reveal an improvement in staffing levels to an average of 60.5% at district level with a significant increase in staffing levels at HCIIIs and HCIVs to 70% and 71% respectively. The key challenge however is the unacceptably low staffing levels at the DHO offices with a potential to impact negatively on service delivery in the districts due to lack of leadership and management at district level.

Table 7: Staffing situation at District Health Offices

From the table below, it can be noted that more than 50 districts (mainly new districts) have less 5 or less DHO staff out of the 11 required at this level. It should also be noted that among the five currently in place are support staff meaning that the staffing of the District Health Offices is really poor.

SUMMARY OF HRH STATUS BY DISTRICT

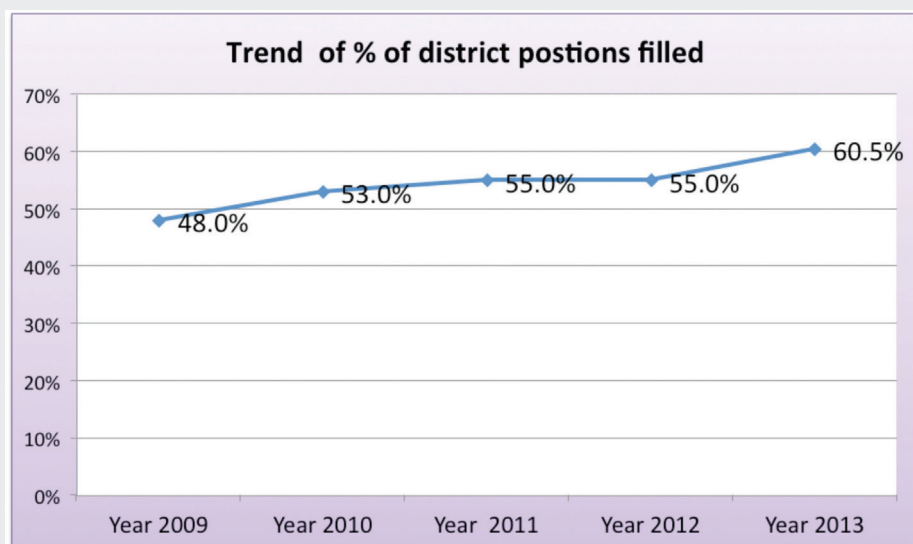

The table below summarises the HRH staffing status by district. Generally there is great improvement in staffing levels in all districts with 34 districts having met the HSSIP target of 70% so far. However districts like Kiruhura, Bududa, Lamwo, Namayingo, Gomba, Kaabong and Buhwenju still have dire staffing levels ranging from 28% to 35%.

	District	No of Units	Total Norms	Filled	Vacant	% Filled	% Vacant

TREND IN HRH STATUS – 2009 – 2013

The staffing levels in the districts have been improving steadily from 48% in 2009 to 60.5 % by June 2013. In absolute numbers the actual increment is significant given that this is associated with increase in number of health facilities which increases the total norms per district over the years.

GENERAL OBSERVATIONS AND RECOMMENDATIONS

Staffing has generally improved especially with the just concluded recruitment drive. However the following may need to be considered to improve staffing even in those districts that still have poor staffing levels:

Recruitment in FY 2013/14 could be considered since funding for wage is likely to be available given that not all the health workers recruited were new. Priority would be given to district Health Offices and districts with staffing less than 50%.

Retention of the recruited health workers is going to be a key factor if the improved staffing levels are to be maintained. The sector with partners could support retention strategies for health workers in districts and particularly the HCIVs and HCIIIs. Provision of staff accommodation is one such retention strategy which needs to be considered for support.

DETAILED HRH STATUS BY DISTRICT

The next sets of tables illustrate the staffing status in each district by level of health facility.

SECTION 3:

STAFF ACCOMMODATION STATUS AS OF JUNE 2013

INTRODUCTION

As was the case for the HRH report, the accommodation status report is also compiled from reports from individual DHOs and Directors of Regional Referral Hospitals (RRHs) submitted via mail. Great appreciation is extended to all DHOs and Hospital Directors who responded in a timely manner to this request despite their busy schedules finalizing the financial year and internet failures.

The accommodation status report details out the status in terms of numbers of staff houses by type currently in place and the gap when compared to the standards set by the MOH. Further the report also gives an insight of the condition of the houses that are currently in place. Financial implications of meeting the set standards are also presented to aid in planning.

THE MOH ACCOMMODATION STANDARDS

According to the infrastructure department of the MOH the staff accommodation standards have been revised with the plan to phase out the one roomed houses. The revised standards are as illustrated in the table below:

Facility Level	Staffing norm	Number of Staff Considered	3 Bed Room house	2 Bed Room
HC II	9	4	0	4
HC III	19	10	0	10
HC IV	48	18	2	16
GH	190	80	16	64
RRH	400	300	72	228

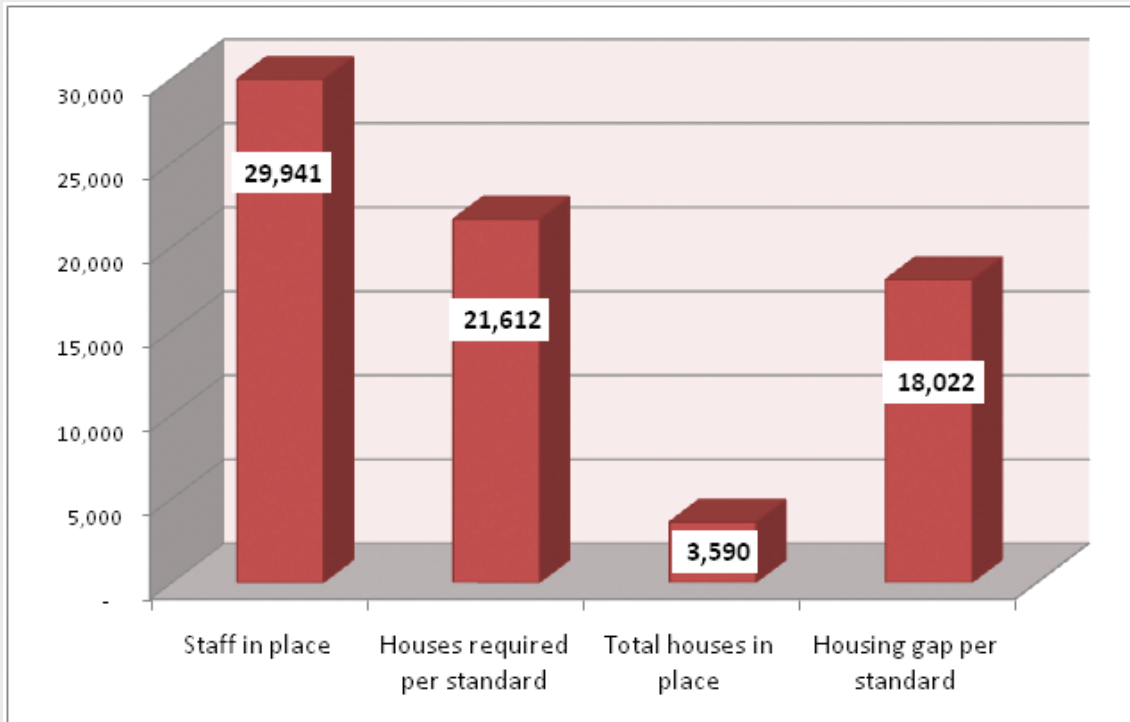

As noted the standards overall cater for approximately 62% of the staffing norms and this varies by level of health facility. For HCIVs for example if the set standards were met, only 38% of staff expected at this level would be accommodated while at HCIII only 53% would be accommodated. This shows that actually the set norms are very modest and are the barest minimum expected at these levels.

As will be demonstrated later under this section the current staff accommodation is a far cry of the norms both in numbers and state of repair. With approximately 70% of the approved positions filled in HCIII and HCIV it means therefore that the staff accommodation is place fall short on both the standards and much more on the actual need making the need to address the issue of accommodation critical for improved staff retention.

STAFF ACCOMMODATION STATUS BY DISTRICT

The staff accommodation status in districts is very poor both in numbers and state repair when compared to the standards.

Figure 5: Staff accommodation summary standard versus current status

Currently the districts have a total of 29,941 staff in post and according to the staffing standards; at least 21,612 houses should be in place to cater for 72% of the staff. However only 3,590 houses are in place catering for 12% of the staff meaning that 26,351 health workers are not accommodated. Since majority of the health workers are in the LLHUs where accommodation for renting is scarce it means that these health workers have to travel long distances to go to work resulting in late coming and absenteeism hence affecting productivity and service delivery.

Further the state of repair of the houses is poor of the 3,590 houses in place only 1,667 are in good state of repair. Below are some pictures taken from the field illustrating the state of repair of most houses.

An example of a two bed - roomed house in one of the districts visited

An example of a one roomed houses in one of the districts visited

This kitchen was turned into a house for a health worker

Table 8: Summary staff accommodation status by district

As observed general the staff accommodation status is poor both in numbers and state of repair.

SUMMARY STAFF ACCOMMODATION STATUS BY RRH

Staff accommodation status in RRH hospitals was surprisingly as poor as that in the districts. Of the 3,600 staff houses needed at this level (according to the standard), only 517 were in place representing 14%. Currently health workers in most RRHs are living under very poor conditions in dilapidated houses most of which were built in 1933 with broken sewage and drainage systems. This as depicted in the photos below from one of the RRHs:

In most of the RRHs health workers are living in garages and uniports.

Table 9: Summary of staff accommodation status in RRHs

GENERAL OBSERVATIONS AND RECOMMENDATIONS

It is undeniable that the living conditions of the Ugandan health workers are unacceptably poor. This of course affects staff morale and if the living conditions are improved could go a long way in improving staff attraction, retention and morale. It is high time therefore that the sector and all partners prioritised provision/improvement of staff houses to improve service delivery and the health of Ugandans in the long run. To move this agenda forward, the following are proposed:

The MOH should develop a comprehensive staff accommodation plan for the short and medium term with a detailed situation analysis and current efforts in this regard which have not been included in this report. This plan would guide implementation in this area.

The MOH should consider advocating for provision of physical staff accommodation as a motivation and retention strategy for health workers in addition to improved pay.

Development partners could consider supporting this effort since every contribution counts.

Together we can improve the living conditions of health workers in this country for better staff attraction, retention and motivation and subsequently to for an improved health status of Ugandans.
